Overview

Crescent Ice Maker CRIM-B12 is a microprocessor-controlled unit with a high ice production capacity of 540 kg daily. It features an advanced cooling system that ensures consistent performance while minimizing energy consumption. It has an enlarged condenser that enhances heat dissipation efficiency, ensuring optimal performance. It features an LCD for precise monitoring and control of key parameters.

Features:

- Low-rate failure
- Stable performance
- Stainless steel chamber
- Advanced refrigerant
- Spacious design
- High daily output

Applications:

Crescent Ice Makers are used in the Food and Beverage Industry, Healthcare, Supermarkets, Laboratories, and Food Processing.

Specifications :
